China Airlines, Ltd.

Financial Statements for the Years Ended December 31, 2015 and 2014 and Independent Auditors' Report

INDEPENDENT AUDITORS' REPORT

The Board of Directors and the Stockholders China Airlines, Ltd.

We have audited the accompanying balance sheets of China Airlines, Ltd. (the "Company") as of December 31, 2015 and 2014 and the related statements of comprehensive income, changes in equity and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Auditing and Attestation of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, based on our audits, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2015 and 2014 and its financial performance and its cash flows for the years then ended, in conformity with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, or other regulations.

As Note 3 described, the Company retrospectively applied the amendments to the Regulations Governing the Preparation of Financial Report by Securities issuers starting January 1, 2015. Therefore, all items affected by the amendments in prior financial statements were adjusted.

March 25, 2016

Notice to Readers

The accompanying financial statements are intended only to present the financial position, financial performance and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such financial statements are those generally applied in the Republic of China.

For the convenience of readers, the independent auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors' report and financial statements shall prevail.

(Concluded)

NOTES TO FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2015 AND 2014 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL INFORMATION

China Airlines, Ltd. (the "Company") was founded in 1959 and its stocks have been listed on the Taiwan Stock Exchange since February 26, 1993. The Company primarily provides air transport services for passengers and cargo. Its other operations include (a) mail services; (b) ground services and routine aircraft maintenance; (c) major maintenance of flight equipment; (d) communications and data processing services to other airlines; (e) sale of aircraft parts, equipment and entire aircraft; and (f) lease of aircraft.

The major stockholders of the Company are the China Aviation Development Foundation (CADF) and the National Development Fund (NDF), Executive Yuan. As of December 31, 2015 and 2014, CADF and NDF held 43.63% and 45.48% of the Company's shares, respectively. As of December 31, 2015 and 2014, the Company had 12,437 and 11,319 employees, respectively.

2. APPROVAL OF FINANCIAL STATEMENTS

The financial statements were approved by the board of directors and authorized for issue on March 25, 2016.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

a. Initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the 2013 version of the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), Interpretations of IFRS (IFRIC), and Interpretations of IAS (SIC) endorsed by the FSC.

Rule No. 1030029342 and Rule No. 1030010325 issued by the FSC on April 3, 2014 stipulated that the Company should apply the 2013 version of IFRS, IAS, IFRIC and SIC (collectively, the "IFRSs") endorsed by the Financial Supervisory Commission (FSC) and the related amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers starting January 1, 2015.

Except for the following, the future initial application of the above 2013 version of IFRSs is not expected to have any material impact on the Company's accounting policies:

1) IFRS 12 "Disclosure of Interests in Other Entities"

IFRS 12 is a new disclosure standard that applies to entities with interests in subsidiaries, joint arrangements, associates and/or unconsolidated structured entities.

2) IFRS 13 "Fair Value Measurement"

IFRS 13 establishes a single source of guidance for fair value measurements. It defines fair value, establishes a framework for measuring fair value, and requires disclosures about fair value measurements. The disclosure requirements in IFRS 13 are more extensive than those required in the current standards. For example, quantitative and qualitative disclosures based on the three-level fair value hierarchy currently required for financial instruments only will be extended by IFRS 13 to cover all assets and liabilities within its scope.

The fair value measurements under IFRS 13 will be applied from January 1, 2015.

3) Amendments to IAS 1 "Presentation of Items of Other Comprehensive Income"

The amendments to IAS 1 requires the Companying of items of other comprehensive income (OCI) into those that (1) will not be reclassified subsequently to profit or loss; and (2) may be reclassified subsequently to profit or loss. Income taxes on OCI items are grouped on the same basis. Under the current IAS 1, there are no such requirements.

The Company apply the above amendments starting in 2015. Items not expected to be reclassified to profit or loss are remeasurements of the defined benefit plans and share of the defined benefit plans of associates and joint ventures accounted for using the equity method. Items expected to be reclassified to profit or loss are the exchange differences on translating foreign operations, unrealized gains (losses) on available-for-sale financial assets, cash flow hedges, and share of the other comprehensive income (except the share of the remeasurements of the defined benefit plans) of associates and joint ventures accounted for using the equity method.

4) Revision to IAS 19 "Employee Benefits"

Revised IAS 19 requires the immediate recognition of all changes in defined benefit obligations and in the fair value of plan assets in the period these changes occur, thus eliminating the "corridor approach" permitted under the current IAS 19. In addition, all past service costs are recognized immediately in the period of plan amendment. The revision requires all remeasurements of the defined benefit plans to be recognized immediately in other comprehensive income so that the net pension asset or liability will reflect the full value of the plan deficit or surplus.

Furthermore, the interest cost and expected return on plan assets used in the current IAS 19 are replaced with net interest on the net defined liability or asset, which is calculated by applying the discount rate to the net defined benefit liability or asset.

The anticipated impact of the initial application of the revised IAS 19 is detailed as follows:

	Carrying Amount	Adjustments Arising from Initial Application	Adjusted Carrying Amount
Impact on assets, liabilities and equity			
January 1, 2014			
Investments accounted for by the equity method	<u>\$ 9,828,118</u>	<u>\$ (8,444</u>)	<u>\$ 9,819,674</u>
Total effect on assets	<u>\$ 9,828,118</u>	<u>\$ (8,444</u>)	<u>\$ 9,819,674</u>
Retained earnings	<u>\$ (3,161,115)</u>	<u>\$ (8,444)</u>	<u>\$ (3,169,559</u>)
Total effect on equity	<u>\$ (3,161,115</u>)	<u>\$ (8,444</u>)	<u>\$ (3,169,559</u>) (Continued)

	Carrying Amount	Adjustments Arising from Initial Application	Adjusted Carrying Amount
December 31, 2014			
Investment accounted for by equity method	<u>\$ 11,075,172</u>	<u>\$ (5,860</u>)	<u>\$ 11,069,312</u>
Total effect on assets	<u>\$ 11,075,172</u>	<u>\$ (5,860</u>)	<u>\$ 11,069,312</u>
Retained earnings	<u>\$ (3,864,876</u>)	<u>\$ (5,860</u>)	<u>\$ (3,870,736</u>)
Total effect on equity	<u>\$ (3,864,876</u>)	<u>\$ (5,860</u>)	<u>\$ (3,870,736</u>)
Impact on total comprehensive income for the year ended December 31, 2014			
Operating cost Operating expense Share of the profit of associates and joint ventures Income tax expense	\$ 128,808,748 9,046,866 (937,446) 798,560	\$ 246 117 (2,460) (62)	\$ 128,808,994 9,046,983 (939,906) 798,498
Total increase amount on net profit for the year		<u>\$ (2,159</u>)	
Items that will not be reclassified to profit or loss: Remeasurements of defined benefit plan Share of the other comprehensive income of associates and joint ventures accounted by equity method	99,277 (34,929)	\$ 363 124	99,640 (34,805)
Income tax relating to items that will not be reclassified	(16,877)	(62)	(16,939)
Total increase (after tax) amount of comprehensive income for the year		<u>\$ 425</u>	(Concluded)

b. New IFRSs in issue but not yet endorsed by the FSC

The Company have not applied the following IFRS, IAS, IFRIC and SIC (collectively, the "IFRSs") issued by the International Accounting Standards Board (IASB) but not yet endorsed by the FSC.

On March 10, 2016, the FSC announced the scope of IFRSs to be endorsed and will take effect from January 1, 2017. The scope includes all IFRSs that were issued by the IASB before January 1, 2016 and have effective dates on or before January 1, 2017, which means the scope excludes those that are not yet effective as of January 1, 2017 such as IFRS 9 "Financial Instruments" and IFRS 15 "Revenue from Contracts with Customers" and those with undetermined effective date. In addition, the FSC announced that the Company should apply IFRS 15 starting January 1, 2018. As of the date the financial statements were authorized for issue, the FSC has not announced the effective dates of other new, amended and revised standards and interpretations.

New, Amended or Revised Standards and Interpretations	Effective Date Announced by IASB (Note 1)
Annual Improvements to IFRSs 2010-2012 Cycle	July 1, 2014 (Note 2)
Annual Improvements to IFRSs 2011-2013 Cycle	July 1, 2014
Annual Improvements to IFRSs 2012-2014 Cycle	January 1, 2016 (Note 3)
IFRS 9 "Financial Instruments"	January 1, 2018
Amendments to IFRS 9 and IFRS 7 "Mandatory Effective Date of IFRS 9 and Transition Disclosures"	January 1, 2018
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture"	To be determined by IASB
Amendments to IFRS 10, IFRS 12 and IAS 28 "Investment Entities: Applying the Consolidation Exception"	January 1, 2016
Amendment to IFRS 11 "Accounting for Acquisitions of Interests in Joint Operations"	January 1, 2016
IFRS 14 "Regulatory Deferral Accounts"	January 1, 2016
IFRS 15 "Revenue from Contracts with Customers"	January 1, 2017
IFRS 16 "Leases"	January 1, 2019
Amendment to IAS 1 "Disclosure Initiative"	January 1, 2016
Amendment to IAS 7 "Disclosure Initiative"	January 1, 2017
Amendments to IAS 12 "Recognition of Deferred Tax Assets for Unrealized Losses"	January 1, 2017
Amendments to IAS 16 and IAS 38 "Clarification of Acceptable Methods of Depreciation and Amortization"	January 1, 2016
Amendments to IAS 16 and IAS 41 "Agriculture: Bearer Plants"	January 1, 2016
Amendment to IAS 19 "Defined Benefit Plans: Employee Contributions"	July 1, 2014
Amendment to IAS 27 "Equity Method in Separate Financial Statements"	January 1, 2016
Amendment to IAS 36 "Impairment of Assets: Recoverable Amount Disclosures for Non-financial Assets"	January 1, 2014
Amendment to IAS 39 "Novation of Derivatives and Continuation of Hedge Accounting"	January 1, 2014
IFRIC 21 "Levies"	January 1, 2014

Note 1: Unless stated otherwise, the above New IFRSs are effective for annual periods beginning on or after the respective effective dates.

- Note 2: The amendment to IFRS 2 applies to share-based payment transactions for which the grant date is on or after July 1, 2014; the amendment to IFRS 3 applies to business combinations for which the acquisition date is on or after July 1, 2014; the amendment to IFRS 13 is effective immediately; the remaining amendments are effective for annual periods beginning on or after July 1, 2014.
- Note 3: The amendment to IFRS 5 is applied prospectively to changes in a method of disposal that occur in annual periods beginning on or after January 1, 2016; the remaining amendments are effective for annual periods beginning on or after January 1, 2016.

The initial application of the above New IFRSs, whenever applied, would not have any material impact on the Company's accounting policies, except for the following:

1) IFRS 9 "Financial Instruments"

Recognition and measurement of financial assets

With regards to financial assets, all recognized financial assets that are within the scope of IAS 39 "Financial Instruments: Recognition and Measurement" are subsequently measured at amortized cost or fair value. Under IFRS 9, the requirement for the classification of financial assets is stated below.

For the Company's debt instruments that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, their classification and measurement are as follows:

- a) For debt instruments, if they are held within a business model whose objective is to collect the contractual cash flows, the financial assets are measured at amortized cost and are assessed for impairment continuously with impairment loss recognized in profit or loss, if any. Interest revenue is recognized in profit or loss by using the effective interest method;
- b) For debt instruments, if they are held within a business model whose objective is achieved by both the collecting of contractual cash flows and the selling of financial assets, the financial assets are measured at fair value through other comprehensive income (FVTOCI) and are assessed for impairment. Interest revenue is recognized in profit or loss by using the effective interest method, and other gain or loss shall be recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses. When the debt instruments are derecognized or reclassified, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.

Except for above, all other financial assets are measured at fair value through profit or loss. However, the Company may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognized in profit or loss. No subsequent impairment assessment is required, and the cumulative gain or loss previously recognized in other comprehensive income cannot be reclassified from equity to profit or loss.

The impairment of financial assets

IFRS 9 requires that impairment loss on financial assets is recognized by using the "Expected Credit Losses Model". The credit loss allowance is required for financial assets measured at amortized cost, financial assets mandatorily measured at FVTOCI, lease receivables, contract assets arising from IFRS 15 "Revenue from Contracts with Customers", certain written loan commitments and financial guarantee contracts. A loss allowance for the 12-month expected credit losses is required for a financial asset if its credit risk has not increased significantly since initial recognition. A loss allowance for full lifetime expected credit losses is required for a financial asset if its credit risk has increased significantly since initial recognition and is not low. However, a loss allowance for full lifetime expected credit losses is required for trade receivables that do not constitute a financing transaction.

For purchased or originated credit-impaired financial assets, the Company takes into account the expected credit losses on initial recognition in calculating the credit-adjusted effective interest rate. Subsequently, any changes in expected losses are recognized as a loss allowance with a corresponding gain or loss recognized in profit or loss.

Hedge accounting

The main changes in hedge accounting amended the application requirements for hedge accounting to better reflect the entity's risk management activities. Compared with IAS 39, the main changes include: (1) enhancing types of transactions eligible for hedge accounting, specifically broadening the risk eligible for hedge accounting of non-financial items; (2) changing the way hedging derivative instruments are accounted for to reduce profit or loss volatility; and (3) replacing retrospective effectiveness assessment with the principle of economic relationship between the hedging instrument and the hedged item.

2) Amendment to IAS 36 "Recoverable Amount Disclosures for Non-financial Assets"

In issuing IFRS 13 "Fair Value Measurement", the IASB made consequential amendment to the disclosure requirements in IAS 36 "Impairment of Assets", introducing a requirement to disclose in every reporting period the recoverable amount of an asset or each cash-generating unit. The amendment clarifies that such disclosure of recoverable amounts is required only when an impairment loss has been recognized or reversed during the period. Furthermore, the Company is required to disclose the discount rate used in measurements of the recoverable amount based on fair value less costs of disposal measured using a present value technique.

3) IFRS 16 "Leases"

IFRS 16 sets out the accounting standards for leases that will supersede IAS 17 and a number of related interpretations.

Under IFRS 16, if the Company is a lessee, it shall recognize right-of-use assets and lease liabilities for all leases on the balance sheets except for low-value and short-term leases. The Company may elect to apply the accounting method similar to the accounting for operating lease under IAS 17 to the low-value and short-term leases. On the statements of comprehensive income, the Company should present the depreciation expense charged on the right-of-use asset separately from interest expense accrued on the lease liability; interest is computed by using effective interest method. On the statements of cash flows, cash payments for the principal portion of the lease liability are classified within financing activities; cash payments for interest portion are classified within operating activities.

The application of IFRS 16 is not expected to have a material impact on the accounting of the Company as lessor.

When IFRS 16 becomes effective, the Company may elect to apply this Standard either retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of the initial application of this Standard recognized at the date of initial application.

4) Amendments to IAS 12 "Recognition of Deferred Tax Assets for Unrealized Losses"

The amendment clarifies that the difference between the carrying amount of the debt instrument measured at fair value and its tax base gives rise to a temporary difference, even though there are unrealized losses on that asset, irrespective of whether the Company expects to recover the carrying amount of the debt instrument by sale or by holding it and collecting contractual cash flows.

In addition, in determining whether to recognize a deferred tax asset, the Company should assess a deductible temporary difference in combination with all of its other deductible temporary differences, unless the tax law restricts the utilization of losses to deduction against income of a specific type, in which case, a deductible temporary difference is assessed in combination only with other deductible temporary differences of the appropriate type. The amendment also stipulates that, when determining whether to recognize a deferred tax asset, the estimate of probable future taxable profit may include some of the Company's assets for more than their carrying amount if

there is sufficient evidence that it is probable that the Company will achieve this, and that the estimate for future taxable profit should exclude tax deductions resulting from the reversal of deductible temporary differences.

Except for the above impact, as of the date the financial statements were authorized for issue, the Company is continuously assessing the possible impact that the application of other standards and interpretations will have on the Company's financial position and financial performance, and will disclose the relevant impact when the assessment is completed.

4. SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

The financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, or other regulations.

Basis of Preparation

The fair value measurements are company into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- a. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- b. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- c. Level 3 inputs are unobservable inputs for the asset or liability.

When preparing its parent company only financial statements, the Company used equity method to account for its investment in subsidiaries, associates and joint ventures. In order for the amounts of the net profit for the year, other comprehensive income for the year and total equity in the parent company only financial statements to be the same with the amounts attributable to the owner of the Company in its consolidated financial statements, adjustments arising from the differences in accounting treatment between parent company only basis and consolidated basis were made to investments accounted for by equity method, share of profit or loss of subsidiaries, associates and joint ventures, share of other comprehensive income of subsidiaries, associates and related equity items, as appropriate, in the parent company only financial statements.

Current and Noncurrent Assets and Liabilities

Current assets include assets held primarily for the purpose of trading, assets expected to be realized within twelve months after the reporting period, and cash and cash equivalents unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period. All other assets such as property, plant and equipment, investment properties, intangible assets and other assets that are not classified as current are classified as noncurrent.

Current liabilities include liabilities held primarily for the purpose of trading, liabilities due to be settled within twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Foreign Currencies

In preparing the financial statements of the Company entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured at historical cost in a foreign currency are not retranslated. Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined.

Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise except for:

- a. Exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;
- b. Exchange differences on transactions entered into in order to hedge certain foreign currency risks.

Exchange differences arising on the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income, in which case, the exchange differences are also recognized directly in other comprehensive income.

For the purposes of presenting financial statements, the assets and liabilities of the Company's foreign operations are translated into New Taiwan dollars using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising are recognized in other comprehensive income.

On the disposal of a foreign operation, all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

Cash Equivalents

Cash equivalents, consisting of commercial paper and time deposits, are highly liquid financial instruments with maturities of three months or less when acquired and with carrying amounts that approximate their fair values.

Inventories

Inventories are primarily expendable and nonexpendable parts and materials, supplies used in operations and items for in-flight sale and are stated at the lower of cost or net realizable value. The costs of inventories sold or consumed are determined using the weighted-average method.

Noncurrent Assets Helds for Sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the non-current asset is available for immediate sale in its present condition. To meet the criteria for the sale being highly probable, the appropriate level of management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell. Recognition of depreciation of those assets would cease.

Investments Accounted for by the Equity Method

Investments in subsidiaries, associates and jointly controlled entities are accounted for by the equity method

a. Investment in subsidiaries

Subsidiaries (including special purpose entities) are the entities controlled by the Company.

Under the equity method, the investment is initially recognized at cost and the carrying amount is increased or decreased to recognize the Company's share of the profit or loss and other comprehensive income of the subsidiary after the date of acquisition. Besides, the Company also recognizes the Company's share of the change in other equity of the subsidiary.

Changes in the Company's ownership interests in subsidiaries that do not result in the Company's loss of control over the subsidiaries are accounted for as equity transactions. Any difference between the carrying amounts of the investment and the fair value of the consideration paid or received is recognized directly in equity.

When the Company's share of losses of a subsidiary equals or exceeds its interest in that subsidiary (which includes any carrying amount of the investment in subsidiary accounted for by the equity method and long-term interests that, in substance, form part of the Company's net investment in the subsidiary), the Company continues recognizing its share of further losses.

The acquisition cost in excess of the acquisition-date fair value of the identifiable net assets acquired is recognized as goodwill. Goodwill is not amortized. The acquisition-date fair value of the net identifiable assets acquired in excess of the acquisition cost is recognized immediately in profit or loss.

When the Company ceases to have control over a subsidiary, any retained investment is measured at fair value at that date and the difference between the previous carrying amount of the subsidiary attributable to the retained interest and its fair value is included in the determination of the gain or loss. Furthermore, the Company accounts for all amounts previously recognized in other comprehensive income in relation to that subsidiary on the same basis as would be required if the Company had directly disposed of the related assets or liabilities.

Profits and losses from downstream transactions with a subsidiary are eliminated in full. Profits and losses from upstream with a subsidiary and side stream transactions between subsidiaries are recognized in the Company's financial statements only to the extent of interests in the subsidiary that are not related to the Company.

b. Investments in associates and joint ventures

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Joint venture is a joint arrangement whereby the Company and other parties that have joint control of the arrangement have rights to the net assets of the arrangement.

The Company uses the equity method to account for its investments in associates and joint ventures.

Under the equity method, an investment in an associate and jointly controlled entity is initially recognized at cost and adjusted thereafter to recognize the Company's share of the profit or loss and other comprehensive income of the associate and jointly ventures. The Company also recognizes the changes in the Company's share of equity of associates and jointly ventures attributable to the Company.

When the Company subscribes for additional new shares of the associate and joint ventures at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment differs from the amount of the Company's proportionate interest in the associate and joint ventures. The Company records such a difference as an adjustment to investments with the corresponding amount charged or credited to capital surplus. If the Company's ownership interest is reduced due to the additional subscription of the new shares of associate and jointly controlled entity, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that associate and joint ventures is reclassified to profit or loss on the same basis as would be required if the investee had directly disposed of the related assets or liabilities. When the adjustment should be debited to capital surplus, but the capital surplus recognized from investments accounted for by the equity method is insufficient, the shortage is debited to retained earnings.

When the Company's share of losses of an associate and joint ventures equals or exceeds its interest in that associate and joint ventures which includes any carrying amount of the investment accounted for by the equity method and long-term interests that, in substance, form part of the Company's net investment in the associate and joint ventures entity, the Company discontinues recognizing its share of further losses. Additional losses and liabilities are recognized only to the extent that the Company has incurred legal obligations, or constructive obligations, or made payments on behalf of that associate and joint ventures.

Any excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets and liabilities of an associate and joint ventures recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and is not amortized. Any excess of the Company's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

The entire carrying amount of the investment (including goodwill) is tested for impairment as a single asset by comparing its recoverable amount with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

The Company discontinues the use of the equity method from the date on which it ceases to have significant influence and joint control. Any retained investment is measured at fair value at that date and the fair value is regarded as its fair value on initial recognition as a financial asset. The difference between the previous carrying amount of the associate and the jointly controlled entity attributable to the retained interest and its fair value is included in the determination of the gain or loss on disposal of the associate and the jointly controlled entity. The Company accounts for all amounts previously recognized in other comprehensive income in relation to that associate and the jointly controlled entity on the same basis as would be required if that associate had directly disposed of the related assets or liabilities.

When the Company transacts with its associate and joint ventures, profits and losses resulting from the transactions with the associate are recognized in the Company' financial statements only to the extent of interests in the associate and the jointly controlled entity that are not related to the Company.

Property, Plant and Equipment

Property, plant and equipment are tangible items that are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes; and are expected to be used more than one period. The cost of an item of property, plant and equipment shall be recognized as assets if, and only if it is probable that future economic benefits associated with the item will flow to the entity; and the cost of the item can be measured reliably. Property, plant and equipment are stated at cost, less subsequent accumulated depreciation and subsequent accumulated impairment loss.

Freehold land is not depreciated.

Depreciation is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. Assets are depreciated over the shorter of the lease term and their useful lives using the straight-line method.

Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

Investment Properties

Investment properties are properties held to earn rentals or for capital appreciation. Investment properties also include land held for a currently undetermined future use.

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation and accumulated impairment loss.

Any gain or loss arising on derecognition of the property is calculated as the difference between the net disposal proceeds and the carrying amount of the asset and is included in profit or loss in the period in which the property is derecognized.

Intangible Assets

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization and accumulated impairment loss. Amortization is recognized on a straight-line basis. The estimated useful life, residual value, and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. The residual value of an intangible asset with a finite useful life shall be assumed to be zero unless the Company expects to dispose of the intangible asset before the end of its economic life.

Impairment of Tangible and Intangible Assets Other Than Goodwill

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets, excluding goodwill, to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Corporate assets are allocated to the individual cash-generating units on a reasonable and consistent basis; otherwise Corporate assets are allocated to the smallest Company of cash-generating units on a reasonable and consistent allocation basis.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the Company use the estimated cash flows to be discounted by future pre-tax discount rate, the discount rate reflects current market time value of money and the specific risks to the asset that the estimated future cash flows have not yet adjusted to the market.

If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount.

When an impairment loss subsequently is reversed, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized in profit or loss.

Financial Instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss.

a. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. All regular way purchases or sales of financial assets means buy or sell financial assets in the period made by regulation or market convention.

1) Measurement category

Financial assets are classified into the following specified categories: Financial assets at fair value through profit or loss, held-to-maturity investments, available-for-sale financial assets and loans and receivables. The classification of financial assets is depending on their nature and purpose of the original recognition. Financial assets are classified into the following categories: Financial assets at fair value through profit or loss and available-for-sale financial assets.

a) Financial assets at fair value through profit or loss

Financial assets are classified as at fair value through profit or loss when the financial asset is either held for trading or it is designated as at fair value through profit or loss.

Financial assets at fair value through profit or loss are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividend or interest earned on the financial asset. Fair value is determined in the manner described in Note 30.

b) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated as available-for-sale or are not classified as loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss.

Changes in the carrying amount of available-for-sale financial assets are recognized in other comprehensive income and will be reclassified to profit or loss when the investment is disposed of or is determined to be impaired.

Dividends on available-for-sale equity instruments are recognized in profit or loss when the Company's right to receive the dividends is established.

Available-for-sale equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity investments are measured at cost less any identified impairment loss at the end of each reporting period and are presented in a separate line item as financial assets carried at cost. If, in a subsequent period, the fair value of the financial assets can be reliably measured, the financial assets are remeasured at fair value. The difference between carrying amount and fair value is recognized in profit or loss or other comprehensive income on financial assets.

c) Loans and receivables

Loans and receivables (including trade receivables, cash and cash equivalent, debt investments with no active market, and other receivables are measured at amortized cost using the effective interest method, less any impairment, except for short-term receivables when the effect of discounting is immaterial.

2) Impairment of financial assets

Financial assets, other than those at fair value through profit or loss and available-for-sale financial assets, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For financial assets carried at amortized cost, such as trade receivables and other receivables, assets are assessed for impairment on a collective basis even if they were assessed not to be impaired individually. Objective evidence of impairment for a portfolio of receivables could include the Company's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period of 60 days, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

For available-for-sale equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, objective evidence of impairment could include the followings:

- a) Significant financial difficulty of the issuer or counterparty;
- b) Breach of contract, such as a default or delinquency in interest or principal payments;
- c) It becoming probable that the borrower will enter bankruptcy or financial re-organization; or
- d) The disappearance of an active market for that financial asset because of financial difficulties.

When an available-for-sale financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income are reclassified to profit or loss in the period.

In respect of available-for-sale equity securities, impairment loss previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized in other comprehensive income. In respect of available-for-sale debt securities, impairment loss are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

For financial assets that are carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables and other receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable and other receivables are considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss except for uncollectible trade receivables and other receivables that are written off against the allowance account.

3) Derecognition of financial assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income is recognized in profit or loss.

b. Equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

An equity instrument is residual interest in any contract after the Company's assets minus all liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

c. Financial liabilities

1) Subsequent measurement

Except for derivative financial instruments, all the financial liabilities are measured at amortized cost using the effective interest method.

2) Derecognition of financial liabilities

The Company derecognizes financial liabilities only when the obligation is discharged, canceled or expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

d. Convertible bonds

The component parts of compound instruments (convertible bonds) issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

On initial recognition, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recorded as a liability on an amortized cost basis using the effective interest method until extinguished upon conversion or the instrument's maturity date. Any embedded derivative liability is measured at fair value.

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognized and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognized in equity will be transferred to capital surplus - share premium. When the conversion option remains unexercised at maturity, the balance recognized in equity will be transferred to capital surplus - share premium.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognized directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component.

e. Derivative financial instruments

The Company enters into a variety of derivative financial instruments to manage its exposure to interest rate foreign exchange rate and fuel price risks, including foreign exchange forward contracts, interest rate swaps, currency options and fuel swaps.

Derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. When the fair value of derivative financial instruments is positive, the derivative is recognized as a financial asset; when the fair value of derivative financial instruments is negative, the derivative is recognized as a financial liability.

Hedge Accounting

The Company enters into some derivative transactions that aim to manage interest rates, exchange rates, fuel prices, and other factors affecting gains or losses on assets and liabilities. The hedging transactions are defined as cash flow hedge. When entering into hedging transactions, the Company has prepared official documents that describe the hedging relationship between hedging instruments and items been hedged, objective of risk management, hedging strategy, and the way to evaluate the effectiveness of the hedging instrument.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income. The gain or loss relating to the ineffective portion is recognized immediately in profit or loss.

The associated gains or losses that were recognized in other comprehensive income are reclassified from equity to profit or loss as a reclassification adjustment in the line item relating to the hedged item in the same period when the hedged item affects profit or loss. If a hedge of a forecast transaction subsequently results in the recognized in other comprehensive income are removed from equity and are included in the initial cost of the non-financial liability.

Hedge accounting is discontinued prospectively when the Company revokes the designated hedging relationship, or when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer meets the criteria for hedge accounting. The cumulative gain or loss on the hedging instrument that has been previously recognized in other comprehensive income from the period when the hedge was effective remains separately in equity until the forecast transaction occurs. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognized immediately in profit or loss.

Provisions

The Company recognizes provisions when the Company has a present obligation (legal or constructive) arising from past events (legal or constructive obligation), payment for the obligation is probable, and the expenditure for settling the obligation can be estimated reliably.

The amount recognized as a provision is the best estimate of the expenditure required to settle the present obligation, taking into account the risks and uncertainties surrounding the obligation as of the balance sheet date. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

Aircraft lease contracts

When the aircraft lease contracts expire and will be returned to lessor, should assess if existing obligations exist and required to recognize as provision when signing of the lease contract.

Revenue Recognition

a. Rendering of services

Passenger fares and cargo revenue are recognized when transport service is provided. The value of unused passenger tickets is recognized as "advance ticket - sales".

b. Dividend and interest income

Dividend income from investments is recognized when the shareholder's right to receive payment has been established provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

a. Financial lease

The Company as lessee

Assets held under finance leases are initially recognized as assets of the Company at the lower of their fair value at the inception of the lease or the present value of the minimum lease payments. The corresponding liability to the lessee is included in the balance sheets as a finance lease obligation.

Minimum lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policy on borrowing costs. Contingent rents are recognized as expenses in the periods in which they are incurred.

b. Sale and leaseback

Sale and leaseback transaction if met the condition that all the risks and rewards of ownership of the leased asset is essentially transfer to the lessee, the sale and leaseback type is finance lease; If part of the significant risks and rewards of the leased asset ownership remain with the lessor (the buyer), the sale and leaseback type is operating lease.

1) Financial lease

This transaction does not actually dispose of the assets, the accounting treatment deemed transaction did not occur, and use the book value of the asset before sale continuing recognition of the asset.

2) Operating lease

If the selling price is equal to the fair value, the transaction gain or loss should be recognized immediately. If selling price is above fair value, the difference between the fair value and the book value of the gain or loss should be recognized immediately; only the part of selling price above fair value shall be deferred and amortized over the period of the lease.

- c. Operating lease
 - 1) The Company as lessor

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease unless another systematic basis is representative of the time pattern of the lessee's benefit from the use of the leased asset.

2) The Company as lessee

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rents arising under operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

Employee Benefits

a. Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

b. Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

Defined benefit costs (including service cost, net interest and remeasurement) under the defined benefit retirement benefit plans are determined using the projected unit credit method. Service cost (including current service cost), past service cost and net interest on the net defined benefit liability (asset) are recognized as employee benefits expense in the period they occur. Remeasurement, comprising actuarial gains and losses, and the return on plan assets (excluding interest), is recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other profit or loss.

Net defined benefit liability represents the actual deficit in the Company's defined benefit plan.

Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets (assets are substantially ready for their intended use or sale through a fairly long period) are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Other than stated above, all other borrowing costs are recognized in profit or loss in the period in which they are incurred.

Frequent Flyer Program

The Company has a "Dynasty Flyer Program" through which program members can convert accumulated mileage to a cabin upgrade, free tickets and other member reward.

A portion of passenger revenue attributable to the rewards for the frequent flyer program is deferred. The entity should recognize this deferred revenue as revenue only when the entity has fulfilled its obligations on the granting of rewards or when the period for converting the mileage to rewards has expired.

Share-based Payment Arrangements

Equity-settled share-based payments to employees are measured at the fair value of the equity instruments at the grant date.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instrument that will eventually vest, with a corresponding increase in capital surplus - employee share options. The fair value determined at the grant date of the equity-settled share-based payments is recognized as an expense in full at the grant date when the share options granted vest immediately.

Taxation

Income tax expense represents the sum of the current tax and deferred tax.

a. Current tax

The current tax liabilities are based on current taxable profit. Since part of the income and expenses are taxable or deductible in other periods, or in accordance with the relevant tax laws are taxable or deductible, current taxable profit differs from net profit reported in the income statement.

The Company's current tax liabilities are calculated by the tax rate has been legislative or substantial legislative at the balance sheet date.

According to the Income Tax Law, an additional tax at 10% of unappropriated earnings is provided for as income tax in the year the stockholders approve the retention of these earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

b. Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences, unused loss carry forward and unused tax credits for purchases of machinery, equipment and technology, research and development expenditures, and personnel training expenditures to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. c. Current and deferred tax for the year

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

Maintenance and Overhaul Costs

Routine maintenance costs are recognized in profit or loss in the period in which they are incurred.

The overhaul costs of the owned or leased aircraft that meet the criteria for fixed asset capitalization and engines as replacement parts for aircraft and engines are capitalized, and amortized over the expected annual overhaul cycle using straight-line depreciation method.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Key Sources of Estimation Uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Income Taxes

The Company is subject to income taxes in numerous jurisdictions. Where the final tax payable differs from the amounts that were initially recognized, these differences will affect the income tax and deferred tax provisions in the period in which the differences are determined. Deferred tax assets are recognized for deductible temporary differences to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be used. When evaluating the realizability of the deferred tax asset, management uses significant accounting judgments and estimates, including expected future revenue growth and profit margins, income tax exemption periods, the use of tax credits, tax planning and certain assumptions. Changes in the industry environment and regulations will result in a material adjustment of the deferred tax asset.

Estimated Impairment of Trade Receivables

The Company assesses the receivables portfolios monthly for impairment. Impairment evidences may include observable changes in debtors' solvency and national or local economic conditions that correlate with default on receivable settlement. Management's analysis of expected cash flows is based on past experience of loss on assets with similar credit risk characteristics. The Company periodically reviews the methods of determining, and assumptions on, the expected amount and timing of cash flows to reduce the difference between the estimated and the actual losses.

Fair Value of Derivatives and Other Financial Instruments

The Company's management uses its judgment in selecting an appropriate valuation technique for financial instruments with no quoted market prices in an active market. Valuation techniques commonly used by market practitioners are applied. For derivative financial instruments, assumptions are based on quoted market rates adjusted for specific features of the instruments. Other financial instruments are valued using a discounted cash flow analysis based on assumptions supported, where possible, by observable market prices or rates. The chosen valuation techniques and assumptions used are possible effecting in determining the fair value of financial instruments.

Depreciation of Property, Plant and Equipment - Flight Equipment

Flight equipment are depreciated on a straight-line basis at rates that can be used to write down their cost to their estimated residual values at the end of their useful lives. The estimates of the useful lives and residual values of the flight equipment are made by the Company on the basis of past experience and fleet operation performance in the industry.

Defined Benefit Obligations

The present value of defined benefit obligations at the end of the reporting period are calculated using actuarial assumptions. Those assumptions, which are based on management's judgment and estimates, comprise the discount rate and expected return on plan assets. Changes in actuarial assumptions may have a material impact on the amount of defined benefit obligations.

Maintenance Reserve for Operating Lease Aircraft

Maintenance reserve is based on the requirement under lease contracts to reflect maintenance costs that may arise on lease expiry. Estimation of this reserve is based on the past maintenance experience on the same or similar type of aircraft; incurred overhaul costs; and historical operating performance data. Changes in judgment or estimations may have a material impact on the amount of maintenance reserve.

Frequent Flyer Program

As stated in Note 4 Frequent Flyer Program, a portion of passenger revenue attributable to the awarding of frequent flyer benefits is deferred until the awards are given out. The deferment of the revenue is estimated on the basis of historical trends of breakage and redemption, which is then used to project the expected claiming of these benefits. Changes in fair value per mileage or redemption rate may have a material impact on deferred revenue.

Impairment of Flight Equipment

The impairment of flight equipment was based on the recoverable amount of those assets, which is the higher of fair value less costs to sell or value-in-use of those assets. Any changes in the market price or future cash flows will affect the recoverable amount of those assets and may lead to recognition of additional or reversal of impairment losses.

6. CASH AND CASH EQUIVALENTS

	December 31			
		2015		2014
Cash on hand and revolving fund	\$	68,883	\$	76,126
Checking accounts and demand deposits		4,385,543		7,686,416
Cash equivalents				
Time deposits with original maturities less than three months	1	4,053,003		7,716,060
Repurchase agreements collateralized by bonds				349,886
	<u>\$ 1</u>	8,507,429	<u>\$</u>	15,828,488

The market rate intervals of cash in bank and cash equivalent at the end of the reporting period were as follows:

	December 31			
	2015	2014		
Bank balance	0.13%-1.7%	0%-1.75%		
Time deposits with original maturities less than three months	0.48%-7.25%	0.39%-4%		
Repurchase agreements collateralized by bonds	-	0.59%-0.8%		

As of December 31, 2015 and 2014, time deposits with original maturities more than 3 months of \$0 thousand and \$507,357 thousand (market interest rates of 4%) were classified as other current assets (Note 17).

7. FINANCIAL INSTRUMENTS AT FAIR VALUE THROUGH PROFIT OR LOSS (FVTPL)

	December 31	
	2015	2014
Financial assets held for trading - current		
Derivative financial instruments (not under hedge accounting) Foreign exchange forward contracts Non-derivative financial assets	\$ 63,818	\$ 46,812
Beneficial certificates	<u>100,029</u> <u>\$ 163,847</u>	<u> </u>
Financial assets held for trading - noncurrent		
Derivative financial instruments (not under hedge accounting) Foreign exchange forward contracts	<u>\$ 1,710</u>	<u>\$</u>

At the end of the reporting period, outstanding foreign exchange forward contracts not under hedge accounting were as follows:

	Currency	Maturity Date	Notional Amount (In Thousands)
December 31, 2015			
Buy forward contracts	NTD/USD	2016.01.08-2017.01.26	NTD3,276,316/USD99,600
December 31, 2014			
Buy forward contracts	NTD/USD	2015.01.02-2015.06.16	NTD1,247,678/USD40,300

8. DERIVATIVE FINANCIAL INSTRUMENTS FOR HEDGING

	Decem	ıber 31
	2015	2014
Derivative financial assets under hedge accounting		
Cash flow hedges Interest rate swaps Foreign exchange forwards contracts Currency options Fuel options	\$	\$ 727 32,285 10,565
	<u>\$ 56,960</u>	<u>\$ 43,577</u>
Current Noncurrent	\$ 45,744 <u>11,216</u>	\$ 42,850 727
	<u>\$ 56,960</u>	<u>\$ 43,577</u>
Derivative financial liabilities under hedge accounting		
Cash flow hedges Interest rate swaps Currency options Fuel options	\$ 12,702 12,660 <u>287,841</u>	\$ 5,150 3,028 <u>2,456,972</u>
	<u>\$ 313,203</u>	<u>\$ 2,465,150</u>
Current Noncurrent	\$ 301,912 <u>11,291</u>	\$ 2,460,000 5,150
	<u>\$ 313,203</u>	<u>\$ 2,465,150</u>

The fair value of each derivative contract is determined using quotes from financial institutions.

a. Interest rate swaps

The Company entered into interest rate swap contracts to mitigate the risk of changes in interest rates on the cash flow exposure related to the outstanding floating rate debt. All swapped fixed interest rate swap out the floating rate interest rate swap contracts are designated as cash flow hedges.

The outstanding interest rate swap contracts at the end of the reporting period were as follows:

Notional Amount (In Thousands)	Maturity Date	Range of Interest Rates Paid	Range of Interest Rates Received
December 31, 2015			
NT\$ 3,000,000	2016.11.28-2017.06.22	1.01%-1.14%	3M TAIBOR rate
December 31, 2014			
NT\$ 4,500,000	2015.05.24-2017.06.22	0.9%-1.14%	6165 page 3M CP rate

The interest rate swaps settle on a quarterly basis. The Company will settle the difference between the fixed and floating interest rates on a net basis.

b. Currency options

The Company entered into currency options to minimize the risk of changes in foreign currency rate on the cash flow exposure related to fuel payments, which will be paid in U.S. dollars.

The outstanding currency options at the end of the reporting period were as follows:

	Currency	Maturity Date	Notional Amount (In Thousands)
December 31, 2015			
Buy USD call option Sell USD put option	JPY/USD JPY/USD	2016.01.8-2016.12.09 2016.01.8-2016.12.09	JPY3,446,570/USD28,400 JPY3,364,604/USD28,400
December 31, 2014			
Buy USD call option Sell USD put option	JPY/USD JPY/USD	2015.01.08-2015.05.15 2015.01.08-2015.05.15	JPY2,044,450/USD17,900 JPY1,973,570/USD17,900

c. Fuel options

The Company used fuel options to minimize the risk of changes in fuel price related to operating cost.

The outstanding fuel options at the end of the reporting period were as follows:

	Currency	Maturity Date	Notional Amount (In Thousands)
December 31, 2015			
Buy fuel call options Sell fuel put options	USD USD	2016.01.31-2016.07.31 2016.01.31-2016.07.31	NTD335 NTD287,841
December 31, 2014			
Buy fuel call options Sell fuel put options	USD USD	2015.3.31-2015.11.30 2015.3.31-2015.11.30	NTD10,565 NTD2,456,972

Based on the Taiwan Stock Exchanges regulation for the public companies monthly declaration on the trading of derivative financial instruments the contractual amounts are shown at the absolute values of fair value because fuel options contracts only have notional amounts.

d. Foreign exchange forward

The Company entered into foreign exchange forward to minimize the risk of changes in foreign currency rate on the cash flow exposure related to fuel payments and aircraft payments, which will be paid in U.S. dollars.

The outstanding foreign exchange forward contracts at the end of the reporting period were as follows:

	Currency	Maturity Date	Notional Amount (In Thousands)
December 31, 2015			
Buy forward contracts	NTD/USD	2016.01.22-2017.05.23	NTD822,368/USD25,000

Gains and losses on hedging instruments reclassified from equity to profit or loss were included in the following line items in the statements of comprehensive income:

	For the Year Ended December 31	
	2015	2014
Increase in operating cost Increase in finance cost Other gain and losses - foreign exchange gain	\$ (2,581,321) (7,151) <u>31,857</u>	\$ (418,329) (7,428) <u>28,333</u>
	<u>\$ (2,556,615</u>)	<u>\$ (397,424</u>)

9. FINANCIAL ASSETS CARRIED AT COST

	December 31			
	201	5	201	4
	Carrying Amount	% of Ownership	Carrying Amount	% of Ownership
Unlisted common stocks				
Everest Investment Holdings Ltd.				
(AH)	\$ 52,704	14	\$ 297,946	14
Jardine Air Terminal Services	56,023	15	56,023	15
Chung Hwa Express Co.	11,000	11	11,000	11
Regal International Advertising	5,925	6	5,925	6
	125,652		370,894	
Unlisted preferred stocks				
Everest Investment Holdings Ltd.				
(AH)	473	-	473	-
	<u>\$ 126,125</u>		<u>\$ 371,367</u>	
Classified according to financial asset measurement categories				
Available-for-sale financial assets	<u>\$ 126,125</u>		<u>\$ 371,367</u>	

The Company and the Asian airlines had set up Abacus International Holdings (AH company) which owned Abacus distributions systems company. Due to strategy and adjustment, AH company disposed of shares of Abacus distribution system company. The board of AH company resolved to return the gain on disposal to shareholders by cash dividends and share redemption and which is approved. The Company received cash dividends of \$1,660,687 thousand and share redemption \$245,242 thousand. AH company changes its name to Everest Investment Holdings Ltd. after the disposal of their subsidiary.

The unlisted common stock held by the Company, are measured at cost less impairment losses at reporting date. Because a reasonable estimate of the fair value range is significant and cannot be reasonably assessed various estimates of probability, the Company's management believes its fair value cannot be reliably measured.

10. NOTES RECEIVABLE AND ACCOUNTS RECEIVABLE

	December 31	
	2015	2014
Notes receivable	<u>\$ 343,647</u>	<u>\$ 290,535</u>
Accounts receivable		
Accounts receivable Less: Allowance for impairment loss	6,964,125 (99,788) 6,864,337	8,664,953 (55,093) 8,609,860
	<u>\$ 7,207,984</u>	<u>\$ 8,900,395</u>

The average credit period was 7 to 45 days. In determining the recoverability of a accounts receivable, the Company considered any change in the credit quality of the accounts receivable since the date credit was initially granted to the end of the reporting period. Allowance for impairment loss were based on estimated irrecoverable amounts determined by reference to past default experience of the counterparties and an analysis of their current financial position.

Movements in the allowance for impairment loss recognized on notes receivable and accounts receivables were as follow:

	For the Year Ended December 31	
	2015	2014
Balance at January 1	\$ 55,093	\$ 45,604
Impairment loss of accounts receivable	46,500	30,000
Less: Amounts written off as uncollectible	(1,805)	(20,511)
Balance at December 31	<u>\$_99,788</u>	<u>\$ 55,093</u>

11. INVENTORIES

	December 31	
	2015	2014
Aircraft spare parts	\$ 7,552,829	\$ 6,393,427
Items for in-flight sale	507,603	454,601
Work in process - maintenance services	143,489	248,348
	<u>\$ 8,203,921</u>	<u>\$ 7,096,376</u>

The cost of inventories recognized as operating costs due to write-downs of inventories was \$151,688 thousand and \$159,682 thousand in 2015 and 2014, respectively.

12. NON-CURRENT ASSETS HELD FOR SALE

	Decem	December 31	
	2015	2014	
Aircraft held for sale	<u>\$ 670,455</u>	<u>\$</u>	

To enhance the competitiveness, the Company plans to introduce new aircrafts and retire old aircrafts on timely schedule. On August 13, 2015, the board of directors resolved to sell two 747-400 aircrafts and one A340-300 aircraft. These aircrafts as non-current assets held for sale, and difference between the original book value and the expected sale price was recognized as impairment loss of 1,899,372 thousand. However the actual amount of loss should be identified by actual sale price. Above measurement of fair value is Level 3 measure which referred to the second-hand market and the conditions of aircrafts.

Dynasty Holidays	51%	51%
Yestrip	100%	100%
Global Sky Express	25%	25%
Freighter Princess Ltd.	100%	100%
Freighter Prince Ltd.	100%	100%

The Company's holdings of the issued share capital of Taoyuan International Airport Service, Taiwan Airport Service and Global Sky Express did not each exceed 50%, but since the Company had control over these investees, they were listed as subsidiaries.

The subsidiaries, Freighter Princess Ltd., and Freighter Prince Ltd., were established for leasing of the Company's aircraft. On its balance sheets, the Company recognized the fixed assets and liabilities related to the leased aircraft as a leasing transaction.

To provide a new generation of aircraft repair services, expand repair market as well as enhance the Company's aircraft repair capability, the board of directors has reached an agreement to establish the "Taiwan Aircraft Maintenance And Engineering Co., Ltd." on August 12, 2014.

The capital stock of Taiwan Aircraft Maintenance And Engineering Co., Ltd. is \$1.35 billion and its establishment was completed on January 16, 2015.

To provide the customers with more diverse options, the board of directors has reached an agreement to establish a low cost carrier, named Tigerair Taiwan Co., Ltd., with Tiger Airways Singapore Pte. Ltd. in the form of joint venture. The capital stock of Tigerair Taiwan Co., Ltd. is \$2,000,000 thousand, which includes \$1,600,000 thousand (80%) from the Company and \$200,000 thousand (10%) from Mandarin Airlines Co., Ltd. Tigerair Taiwan Co., Ltd. was established on April 21, 2014 and started operating on September 26, 2014.

The disposal proceeds of Yangtze River Express of \$763,606 thousand was remitted back to the Company as deducted capital by CAL-Asia Investment.

The share of profit or loss of subsidiaries recognized under equity method was as follows:

	2015	2014
The share of profit or loss	\$ 146,472	\$ 489,024
b. Investments in associates

	December 31		
	2015	2014

Prepayment of long-term investment - Science Park Logistics	64,091		
	<u>\$ 1,248,135</u>	<u>\$ 1,130,840</u>	

On December 18, 2015 the board of Science Park Logistics (SPL) approved the issuance of common stock for cash and with the date of right issues granted on was December 25, 2015. The board of Company has reached an agreement to purchase \$64,091 thousand which had been remitted to SPL by December 31, 2015. SPL completed the registration of this subscription on January 22, 2016.

As the end of the reporting period, the proportion of ownership and voting rights in associates held by the Company were as follows:

	December 31	
	2015	2014
China Aircraft Services	20%	20%
Kaohsiung Catering Services	36%	36%
Asian Compressor Technology Services	25%	25%
Science Park Logistics	28%	28%

The share of profit or loss of associates recognized under equity method were as follows:

	2015	2014
China Aircraft Services Asian Compressor Technology Services Kaohsiung Catering Services Science Park Logistics	\$ 46,247 93,375 58,084 16,373	\$ 35,664 100,716 49,086 23,426
	<u>\$ 214,079</u>	<u>\$ 208,892</u>

c. Investments in jointly controlled entities

The investments in jointly controlled entities were as follows:

	December 31	
	2015	2014
China Pacific Catering Services China Pacific Laundry Services	\$ 705,134 <u>161,869</u>	\$ 743,817 <u>166,192</u>
	<u>\$ 867,003</u>	<u>\$ 910,009</u>

At the end of the reporting period, the percentage of ownership and voting rights in jointly controlled entities held by the Company were as follows:

	December 31	
	2015	2014
China Pacific Catering Services	51%	51%
China Pacific Laundry Services	55%	55%

The Company signed a joint venture agreement with the Taikoo Company to invest in China Pacific Catering Services and China Pacific Laundry Services. According to the agreement, both sides on the board have major motion veto, therefore the Company does not have its control power.

The share of profit or loss of jointly ventures recognized under equity method were as follows:

	December 31	
	2015	2014
China Pacific Catering Services China Pacific Laundry Services	\$ 231,012 	\$ 212,571
	<u>\$ 254,491</u>	<u>\$ 241,990</u>

The investments in subsidiaries, associates and joint ventures accounted for by the equity method and the share of profit or loss and other comprehensive income of those investments for the years ended December 31, 2015 and 2014 was based on the subsidiaries, associates and joint ventures' financial statements audited by the auditor for the same years.

Service, major business offices and country of company registered of above can be referred to Tables 5 and 6 (names, locations, and related information of investees on which the Company exercises significant influence and investment in Mainland China).

Five-year convertible bonds - issued at discount in December 2013; repayable in lump sum upon maturity; 1.8245% discount rate p.a.	2013.12.26-2018.12.26	Unless bonds are converted to capital stock or redeemed, principal repayable one time in December 2018; 1.8245% discount rate p.a	-

The indicator rate mentioned above is the 90 days' commercial paper rates in Taiwan's secondary market.

In January 2012, the Company made a first issue of 2012 private unsecured bonds with aggregate face value of \$5,785,000 thousand. The investors included these affiliates: Taoyuan International Airport Services, Mandarin Airlines and Abacus Distribution Systems (Taiwan) held \$440,000 thousand of its face value in aggregate and would be written off in the consolidation financial report. Private unsecured bonds were all expired and paid off in January 2015.

The Company made the fifth issue of unsecured convertible bonds, and the issue conditions are as follows:

- a. The holders may demand a lump-sum payment for the bonds upon maturity.
- b. The holders can request the Company to repurchase their bonds at 100.75% face value on the third anniversary of the offering date. Because the holders can exercise selling rights, the Company reclassified the bonds payable to "current portion of bonds payable".
- c. The Company may redeem the bonds at face value between March 26, 2014 and November 16, 2018 under certain conditions.
- d. Between January 26, 2014 and December 16, 2018 (except for the period between the ex-dividend date and the date of dividend declaration on record), holders may convert the bonds to the Company's common shares. The initial conversion price was set at NT\$12.24, subject to adjustment if there is capital injection by cash, stock dividend distribution, and the proportion of cash dividend per share in market price exceed 1.5%. As of December 31, 2015, there was no adjustment to the conversion price, but corporate bonds with a face value of \$3,315,700 thousand had been converted to 270,890 thousand of common shares.

The convertible bonds contain both liability and equity components. The equity component was presented in equity under the heading of capital surplus - options. The effective interest rate for the liability component was 1.8245% per annum on initial recognition.

Proceeds from issue	\$ 6,000,000
Equity component	(518,621)
Liability component at the date of issue	<u>\$ 5,481,379</u>

20. CAPITAL LEASE OBLIGATIONS

a. Sale-leaseback - finance lease

	December 31	
	2015	2014
Minimum lease payments - aircraft		
Not later than one year Later than one year and not later than five years	\$ 1,428,467 5,079,133	\$ 2,727,933 <u>6,945,200</u>
Present value of minimum lease payments	<u>\$ 6,507,600</u>	<u>\$ 9,673,133</u>
Current Noncurrent	\$ 1,428,467 5,079,133	\$ 2,727,933 <u>6,945,200</u>
	<u>\$ 6,507,600</u>	<u>\$ 9,673,133</u>
Interest rate	1.1828%- 1.5667%	1.287%- 1.667%

As of December 31, 2015, the Company has leased engines and A330-300, A340-300, B747-400 total 5 aircraft by sale-leaseback under finance leases. The lease terms are from June 2006 to April 2019. During the lease term, the Company retained all risks and rewards attached to aircraft and engines, and enjoyed the same substantive right prior to the transaction. Interest rate underlying all obligation under finance leases were floated. Therefore, the minimum lease payments under sale-leaseback aircraft contract are not inclusive of interest expense.

b. Operating lease (including sale lease back - operating lease)

The Company rented planes head quarter and hangars under various operating lease contracts expiring on various dates until November 2026. The Company does not have a bargain purchase option to acquire the leased planes and hangar at the expiration of the lease periods.

The rental rates stated in the aircraft lease agreements are fixed or floated. If the agreed-upon rental rate is floating and will be revised monthly or semiannually. Subleasing is not allowed for all the lease arrangements. As of December 31, 2015, the Company has rented eleven A330-300 aircrafts, eight B737-800 aircrafts and eight 777-300 ER aircrafts under operating contracts; the lease terms range from 8 to 12 years, with an extension option.

As of December 31, 2015 and 2014, the refundable deposits paid by the Company under operating lease contracts were \$329,155 thousand and \$544,694 thousand, respectively. Part of the refundable deposits is secured by credit guarantees. The credit guarantees were \$1,213,309 thousand and \$528,196 thousand, respectively.

The future minimum lease payments for the noncancelable operating lease commitments were as follows:

	December 31	
	2015	2014
Up to 1 year	\$ 8,571,767	\$ 5,288,346
Over 1 year to 5 years	31,781,215	20,303,770
Over 5 years	32,297,131	18,723,586
	<u>\$ 72,650,113</u>	<u>\$ 44,315,702</u>

The lease payments recognized in profit or loss for the current period were as follows:

	For the Year Ended December 31	
	2015	2014
Minimum lease payment	<u>\$ 7,210,055</u>	<u>\$ 4,019,389</u>

21. OTHER PAYABLES

	December 31

	Decem	December 31		
	2015	2014		
Operating lease - aircraft	<u>\$ 5,033,257</u>	<u>\$ 3,416,601</u>		

The Company rented flight equipment under operating lease agreements. Under the contracts, when the Company returns aircraft to the lessor, the flight equipment have to be repaired on the basis of operating years and flight hours, flight cycle and the engine revolution times; for these contracts, the Company recognizes a provision after entering into the lease contracts or during the lease term.

	Aircraft Lease Contract
Balance at January 1, 2014 Additional provisions recognized Usage	\$ 2,591,678 1,217,163 (392,240)
Balance at December 31, 2014	<u>\$ 3,416,601</u>
Balance at January 1, 2015 Additional provisions recognized Usage	\$ 3,416,601 1,620,216 (3,560)
Balance at December 31, 2015	<u>\$ 5,033,257</u>

24. RETIREMENT BENEFIT PLANS

a. Defined contribution plans

The Company adopted a pension plan under the Labor Pension Act (the "LPA"), which is a state-managed defined contribution plan. Under the LPA, an entity makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

b. Defined benefit plans

The Company adopted the defined benefit plan under the Labor Standards Law, under which pension benefits are calculated on the basis of the length of service and average monthly salaries of the six months before retirement. The Company contribute amounts equal to 6%-9.5% of total monthly salaries and wages to a pension fund administered by the pension fund monitoring committee. Pension contributions are deposited in the Bank of Taiwan in the committee's name.

Before the end of each year, the Company assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, the Company is required to fund the difference in one appropriation that should be made before the end of March of the next year. The pension fund is managed by the Bureau of Labor Funds, Ministry of Labor ("the Bureau"); the Company has no right to influence the investment policy and strategy.

The amounts included in the balance sheets in respect of the Company's defined benefit plans were as follows:

	December 31		
	2015	2014	
Present value of defined benefit obligation Fair value of plan assets	\$ 10,769,419 (1,803,890)	\$ 10,523,038 (1,852,469)	
Net defined benefit liability	<u>\$ 8,965,529</u>	<u>\$ 8,670,569</u>	

Movements in net defined benefit liability were as follows:

	Present Value of the Defined Benefit Obligation	Fair Value of the Plan Assets	Net Defined Benefit Liability (Asset)

Recognized in other comprehensive income	566,921	(25,230)	541,691
Contributions from the employer	-	(582,644)	(582,644)
Benefits paid	(799,982)	685,017	(114,965)
Balance at December 31, 2015	<u>\$ 10,769,419</u>	<u>\$ (1,803,890</u>)	<u>\$ 8,965,529</u>

Through the defined benefit plans under the Labor Standards Law, the Company is exposed to the following risks:

- 1) Investment risk: The plan assets are invested in domestic and foreign equity and debt securities, bank deposits, etc. The investment is conducted at the discretion of the Bureau or under the mandated management. Based on relevant regulations, the return generated by plan assets should not be below the interest rate for a two-year time deposit with local banks.
- 2) Interest risk: A decrease in the government bond interest rate will increase the present value of the defined benefit obligation; however, this will be partially offset by an increase in the return on the plan's debt investments.
- 3) Salary risk: The present value of the defined benefit obligation is calculated by reference to the future salaries of plan participants. Thus, an increase in the salaries of the plan participants will increase the present value of the defined benefit obligations.

The actuarial valuations of the present value of the defined benefit obligation were carried out by qualified actuaries. The significant assumptions used for the purposes of the actuarial valuations were as follows:

	December 31	
	2015	2014
Discount rate	1.11%	1.68%
Expected rate of salary increase	1.00%	1.50%

If possible reasonable change in each of the significant actuarial assumptions will occur and all other assumptions will remain constant, the present value of the defined benefit obligation would increase (decrease) as follows:

	December 31			
	2015 2		2015 2014	2014
Discount rate				
0.5% increase	\$ (475,494)	\$ (466,132)		
0.5% decrease	\$ 515,961	\$ 505,803		
Expected rate of salary increase	<u> </u>	<u>.</u>		
0.5% increase	<u>\$ 495,727</u>	<u>\$ 495,885</u>		
0.5% decrease	<u>\$ (465,377</u>)	<u>\$ (456,214</u>)		

The sensitivity analysis presented above may not be representative of the actual change in the present value of the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

	December 31		
	2015	2014	
The expected contributions to the plan for the next year	<u>\$ 583,456</u>	<u>\$ 460,500</u>	
The average duration of the defined benefit obligation	9.9 years	9.7 years	

25. EQUITY

a. Share capital

Common shares

	December 31		
	2015	2014	
Numbers of shares authorized (in thousands) Amount of shares authorized Amount of shares issued	<u>6,000,000</u> <u>60,000,000</u> <u>54,708,901</u>	<u>6,000,000</u> <u>60,000,000</u> <u>52,491,666</u>	

The Company issued the 5th domestic unsecured convertible bonds amounting to \$2,713,900 thousand convertible bonds holders apply for conversion, and the capital shares exchanged 221,724 thousand and entitled to change registration after issuing new shares.

On March 27, 2015 the Company's board of directors approved the issuance of 700,000 thousand shares. After the registration of this issuance with the authorities, prevailing stock market conditions indicated that stock issuance would not be favorable for the Company. In consideration of the overall interests of the Company, the board decide to cancel this share issuance.

b. Capital surplus

	December 31		
		2015	2014
Issue of stock in excess of par value and conversion premium	\$	552,470	\$ 1,511,953
Employee stock options expired		11,747	11,747
Long-term investment		1,019	955
Gain on sale of treasury shares held by subsidiaries		1,156	1,156
Bonds payable equity component		232,023	466,604
	\$	798,415	<u>\$ 1,992,415</u>

The capital surplus from shares issued in excess of par (additional paid-in capital from issuance of common shares and treasury stock transactions) and donations may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to capital (limited to a certain percentage of the Company's paid-in capital and once a year).

The capital surplus from long-term investments and employee stock options expired may not be used for any purpose. Besides, capital surplus from conversion of employee stock and convertible bonds payable may not be used for any purpose.

c. Appropriation of earnings and dividend policy

The Company's Articles of Incorporation provide that the following should be appropriated from annual net income (less any deficit): (a) 10% as legal reserve, and (b) special reserve equivalent to a debit balance of any stockholders' equity account. From the remainder, the Company should also appropriate at least 3% as bonus to employees. Of the final remainder, at least 50% should be distributed to stockholders as cash or stock dividends (cash dividend should not be less than 30% of the total dividends). In determining the amount of cash dividends to be distributed, the board of directors should take into account future cash requirements of the Company, primarily cash requirements for future aircraft acquisitions. Distribution of earnings generated in prior years should also meet the foregoing guidelines.

All earnings appropriations should be made and approved by the stockholders in, and given effect to in the financial statements of, the year following the year of earnings generation.

In accordance with the amendments to the Company Act in May 2015, the recipients of dividends and bonuses are limited to shareholders and do not include employees. The consequential amendments to the Company's Articles of Incorporation had been proposed by the Company's board of directors on and are subject to the resolution of the shareholders in their meeting to be held on June 24, 2016. For information about the accrual basis of the employees' compensation and the actual appropriations, please refer to f. employee benefits expense in Note 26.

Appropriation of earnings in 2013

On June 18, 2014, the stockholders resolved to offset the accumulated deficit in 2013. The deficit, included a net loss of \$1,274,046 thousand, other retained earning of \$45,381 thousand, the beginning unappropriated deficits of \$6,089,872 thousand, and reversed the special reserve of \$3,926,293 thousand by corporate charter. Therefore, the remaining amount of accumulated deficit before compensation was \$3,483,006 thousand. The Company offset the accumulated deficit against legal reserve of \$321,891 thousand. No bonus to employees was appropriated for 2013 because of a net loss in that year.

Under the Company Law, legal reserve should be appropriated until it equals the Company's paid-in capital. This reserve may be used to offset a deficit. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

Appropriation of earnings in 2014

On June 26, 2015, the stockholders resolved to offset the accumulated deficit in 2014. The deficit, included a net loss of \$751,232 thousand, other retained earning of \$47,471 thousand, the unappropriated deficits of \$3,161,115 thousand. Therefore, the remaining amount of accumulated deficit was \$3,864,876 thousand. The Company offset the accumulated deficit against before compensation legal reserve of \$1,511,953 thousand. No bonus to employees was appropriated for 2014 because of a net loss in that year.

The appropriations of earnings for 2015 had been proposed by the Company's board of directors on March 25, 2016. The appropriations and dividends per share were as follows:

	Appropriation of Earnings	Dividends Per Share (NT\$)
Legal reserve	\$ 287,224	
Special reserve	76,486	
Cash dividends	2,508,526	\$0.458522382

The appropriations of earnings for 2015 are subject to the resolution of the shareholders' meeting to be held on June 24, 2016.

d. Other equity items

The existing Articles of Incorporation of the Company stipulate to distribute bonus to employees at the rates 3% of distributable earnings (net of tax). No bonus to employees was estimated for 2014 because of a net loss in that year.

<u>\$ 19,116,761</u>

\$ 14,864,021

To be in compliance with the Company Act as amended in May 2015, the board of directors in proposed in November 2015 amendments to the Company's Articles of Incorporation. Under these amendments, the Company will distribute employees' compensation at rates of no less than 3% of net profit before income tax and employees' compensation. For the year ended December 31, 2015, employees' compensation of \$1,810,196 thousand was approved based on the certain rate of net profit. The employees' compensation in cash for the year ended December 31, 2015, which was approved by the Company's board of directors on January 15, 2016, is subject to the shareholders' approval of the amendments to the Company's Articles of Incorporation in their June 24, 2016 meeting, during which a report of the employees' compensation will be reported.

Material differences between such estimated amounts and the amounts proposed by the board of directors on or before the date the annual financial statements are authorized for issue are adjusted in the year the bonus and remuneration were recognized. If there is a change in the proposed amounts after the annual financial statements were authorized for issue, the differences are recorded as a change in accounting estimate.

Information on the employees' compensation resolved by the Company's board of directors in 2016 and bonus to employees, resolved by the shareholders' meeting in 2015 and 2014 are available on the Market Observation Post System website of the Taiwan Stock Exchange.

27. INCOME TAX

a. Income tax recognized in profit or loss

The major components of tax expense were as follows:

	For the Year Ended December 31		
		2015	2014
Current tax			
Current year	\$	57,378	\$ 50,615
Prior year adjustment		1,983	(8,835)
Deferred tax			
Current year	· ·	1,014,747	 756,718
Income tax expense recognized in profit or loss	<u>\$</u>	1,074,108	\$ 798,498

A reconciliation of accounting profit and income tax expense is as follows:

	For the Year Ended December 3	
	2015	2014
Profit before tax	<u>\$ 6,837,822</u>	<u>\$ 49,425</u>
Income tax expense calculated at the statutory rate (17%) Add (deduct) tax effects of:	\$ 1,162,430	\$ 8,402
Nondeductible expenses in determining taxable income	11,716	18,603
Temporary differences	478,850	69,632
Tax-exempt income	(87,683)	(96,637)

d. Unused tax loss carryforwards as of December 31, 2015 were as follows:

Expiry Year	Unused Amount
2019	\$ 17,674,629
2021	2,899,496
2022	598,471
	<u>\$ 21,172,596</u>

e. Integrated income tax

	December 31		
	2015	2014	
Imputation credit accounts	<u>\$ 539,835</u>	<u>\$ 385,435</u>	

Expected creditable tax ratios in 2015 is 18.79%, the Company had accumulated deficit as of December 31, 2014; thus, there were no expected creditable tax ratios.

Under the Income Tax Law, for distribution of earnings generated after January 1, 1998, the imputation credits allocated to ROC resident stockholders of the Company was calculated based on the creditable ratio as of the date of dividend distribution.

f. The income tax returns of the Company through 2013 have been examined by the tax authorities.

28. EARNINGS (LOSS) PER SHARE

The numerators and denominators used in calculating earnings (loss) per share were as follows:

	For the Year Ended December 31		
	2015	2014	
Basic earnings (loss) per share Diluted earnings (loss) per share	<u>\$ 1.06</u> <u>\$ 1.00</u>	<u>\$ (0.14)</u> <u>\$ (0.14</u>)	
	For the Year En	ded December 31	
	2015	2014	
Earnings used in the computation of basic earnings per share Effect of potentially dilutive ordinary shares:	\$ 5,763,714	\$ (749,073)	
Interest on convertible bonds (after tax)	47,716	<u> </u>	
Earnings used in the computation of diluted earnings per share	<u>\$ 5,811,430</u> For the Veer Fr	<u>\$ (749,073)</u> ded December 31	
	2015	2014	
 Weighted average number of ordinary shares in computation of basic earnings per share Effect of potentially dilutive ordinary shares: Convertible bonds Employees' compensation or bonus issue 	5,432,728 255,186 <u>150,850</u>	5,199,401	
Weighted average number of ordinary shares used in the computation of diluted earnings per share	5,838,764	5,199,401	

If the Company offered to settle compensation or bonuses paid to employees in cash or shares, the Company assumed the entire amount of the compensation or bonus would be settled in shares and the resulting potential shares were included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, if the effect is dilutive. Such dilutive effect of the potential shares was included in the computation of diluted earnings per share, if the effect is share until the number of shares to be distributed to employees is resolved in the following year.

29. CAPITAL MANAGEMENT

The Company manages its capital to ensure that entities in the Company will be able to continue as going concerns while maximizing the return to stakeholders through the optimization of the debt and equity balance. The capital structure of the Company consists of net debt (borrowings offset by cash and cash equivalents) and equity of the Company comprising issued capital, reserves, retained earnings, other equity and non-controlling interests.

To support its operating activities and purchase of aircraft, the Company needs to maintain sufficient capital. Therefore, the goal of capital management is to ensure financial resources and operating plan is able to support the future working capital, capital expenditures, debt repayment and dividend expenses and other needs.

30. FINANCIAL INSTRUMENTS

- a. Fair values of financial instruments
 - 1) Fair value of financial instruments not carried at fair value

		December 31				
	20	2015		14		
	Carrying Amount	Fair Value	Carrying Amount	Fair Value		
Financial liabilities						
Bonds payable Loans and debt	\$ 15,844,106 83,532,457	\$ 16,459,680 83,693,104	\$ 27,348,836 83,375,375	\$ 28,381,058 83,505,438		

Some long-term debts and capital lease obligations are floating-rate financial liabilities, so their carrying values are their fair values. The fair values of long-term debts and private bonds with fixed interest rates are estimated at the present value of expected cash flows discounted at rates of 0.433% in 2015 and 0.436% in 2014 prevailing in the market for long-term debts (Level 2). Fair values of bond payable trading in OTC and based on quoted market prices (Level 1).

December 31, 2015

	Level 1	Level 2	Level 3	Total
Financial assets at FVTPL Derivative instrument Beneficial certificates	\$ - <u>100,029</u> <u>\$ 100,029</u>	\$ 65,528 	\$ 	\$ 65,528 100,029 \$ 165,557

December 31, 2014

	Level 1	Level 2	Level 3	Total
Financial assets at FVTPL Derivative instrument	<u>\$</u>	<u>\$ 46,812</u>	<u>\$</u>	<u>\$ 46,812</u>
Derivative financial assets for hedging Derivative financial liabilities for	<u>\$</u>	<u>\$ 727</u>	<u>\$ 42,850</u>	<u>\$ 43,577</u>
hedging	<u>\$ -</u>	<u>\$ 5,150</u>	<u>\$ 2,460,000</u>	<u>\$ 2,465,150</u>

There were no transfers between Level 2 and 3 in the current and prior periods.

2) Valuation techniques and inputs applied for the purpose of measuring Level 2 fair value measurement

Financial Instruments	Valuation Techniques and Inputs		
Derivatives - foreign exchange	Discounted cash flow. Future cash flows are estimated based		
forward contracts and	on observable forward exchange rates at the end of the		
interest rate swaps	reporting period and contract forward rates, discounted at a		
-	rate that reflects the credit risk of various counterparties.		

3) Valuation techniques and inputs applied for the purpose of measuring Level 3 fair value measurement

The fair values of foreign exchanges and fuel options are determined using option pricing models where the significant unobservable inputs are historical volatility. An increase in the historical volatility used in isolation would result in an decrease in the fair value of foreign exchanges and fuel options.

Because some financial instruments and non financial instruments are not required to disclose their fair value, the total fair value shown in this note can not represents total value of the Company.

b. Categories of financial instruments

	December 31		
	2015	2014	
Financial assets			
Financial assets at FVTPL Available-for-sale financial assets (3) Derivative financial assets for hedging Loans and receivables (1)	\$ 165,557 126,125 56,960 <u>27,834,830</u> <u>\$ 28,183,472</u>	371,367 43,577 27,358,789	
Financial liabilities			
Derivative financial liabilities for hedging Financial liabilities at amortized cost (2)	\$ 313,203 <u>119,588,050</u>		
	<u>\$ 119,901,253</u>	<u>\$ 129,672,150</u>	

- 1) The balances included loans and receivables measured at amortized cost, which comprise cash and cash equivalents, notes and accounts receivables, accounts receivable related parties, other receivables, refundable deposits, other financial asset and other restricted financial asset.
- 2) The balances included financial liabilities measured at amortized cost, which comprise short-term loans, short-term notes payable, notes and accounts payables, accounts payable related parties, other payable, bonds payable and long-term loans, capital lease obligation, part of other current liabilities, part of other noncurrent liability and guarantee deposit.
- 3) Including the Financial assets measured at cost.
- c. Financial risk management objectives and policies

The Company has risk management and hedging strategies to respond to changes in the economic, financial environment and in the fuel market. To reduce the financial risks from changes in interest, exchange rates and fuel prices, the Company has its operating costs stay within a specified range by using appropriate financial hedging instruments and hedging percentages in accordance with the "Processing Program of Derivative Financial Instrument Transactions" approved by Company stockholders to reduce the impact of changes in market price on earnings. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

In addition, the Company has a risk management committee, which meets periodically to evaluate the performance of derivative instruments and determine the appropriate hedging portion. This committee informs the Company of global economic and financial conditions, controls the entire financial risk resulting from changes in the financial environment and fuel prices, and develops the strategy and response to avoid financial risk with the assistance of financial risk experts to effect risk management.

1) Market risk

The Company is primarily exposed to the financial risks of changes in foreign currency exchange rates and interest rates. The Company entered into derivative financial instruments to manage its exposure to foreign currency risk and interest rate risk.

The Company enters into forward contracts, foreign currency option contracts, and interest swap contracts with fair values that are highly negatively correlated to the fair values of hedged items and evaluates the hedging effectiveness of these instruments periodically.

a) Foreign currency risk

The Company enters into foreign currency option contracts to hedge against the risks on change in related exchange rates, enters into forward contracts to hedge against the risks on changes in foreign-currency assets, liabilities and commitments in the related exchange rates.

Sensitivity analysis

The Company is mainly exposed to the U.S. dollar.

The following details the Company's sensitivity to increase and decrease in New Taiwan dollars (the functional currency) against the relevant foreign currencies. U.S. dollars increase/decrease one dollar against New Taiwan dollars used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis included only outstanding foreign currency denominated monetary items and foreign currency forward contracts designated as cash flow hedges, and adjusts their translation at the end of the reporting period for U.S. dollars increase/decrease one dollar against New Taiwan dollars change in foreign currency rates.

When New Taiwan dollars increase one dollar against U.S. dollars and all other variables were held constant, there would be an decrease in pre-tax profit in 2015 \$127,516 thousand and decrease in pre-tax profit in 2014 \$123,024 thousand, respectively.

b) Interest rate risk

The Company enters into interest swap contracts to hedge against the risks on change in net liabilities interest rates.

The risk is managed by the Company by maintaining an appropriate mix of fixed and floating rate borrowings, and using interest rate swap contracts and forward interest rate contracts.

The carrying amount of the Company's financial liabilities with exposure to interest rates at the end of the reporting period were as follows.

	December 31			
		2015		2014
Fair value interest rate risk Cash flow interest rate risk		16,540,596 89,343,567	\$	33,174,970 93,380,512

Sensitivity analysis

The sensitivity analyses below were determined based on the Company's exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis was prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 100 basis point increase or decrease was used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

Had interest rates increased 100 basis points and had all other variables been held constant, the Company's pretax profit for the year ended December 31, 2015 would have decreased by \$641,000 thousand.

Had interest rates increase 100 basis points and had all other variables been held constant, the Company's pretax profit for the year ended December 31, 2014 would have decreased by \$645,000 thousand.

c) Other price risk

The Company is exposed to fuel price risk on its purchase of aviation fuel. The Company enters into fuel option contract to hedge against adverse risks on fuel price changes.

Sensitivity analysis

The sensitivity analyses below were determined based on the exposure to fuel price risks at the end of the reporting period.

	For the Year Ended December 31			
	2015		201	4
		Other		Other
		Compre-		Compre-
		hensive		hensive
	Pre-tax Profit	Income	Pre-tax Profit	Income
	Increase (Decrease)	Increase (Decrease)	Increase (Decrease)	Increase (Decrease)
	(,	(,	(,	(
Fuel price increase 5%	\$ 9,799	\$ (32,769)	\$ 31,646	\$ 316,498
Fuel price decrease 5%	(9,799)	(106,002)	(32,545)	(134,513)

2) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company's credit risk, primarily comes from accounts receivable generated from operating activities and bank deposits generated from investing activities, fixed investment income and other financial instruments, operation related credit risk and financial credit risk are managed separately.

Operation - related credit risk

The Company has established procedures to management operations related credit risk to maintain the quality of accounts receivable.

To assess individual customers, the Company consider into the financial condition of the customers, the credit rating agency rating, the Company's internal credit rating, transaction history and current economic conditions and many other factors that may affect the repayment. Sometimes, the Company uses certain credit enhancement tools to reduce the credit risk of specific customers.

Since the customers of the industry is dispersed and non-related, the credit risk concentration is not critical aviation.

Financial credit risk

Credit risk on bank deposits, investments income and other financial instruments are measured and monitor by the Company's finance department. The Company's trading partners and other parties were well-performing banks and financial institutions, corporations, and government agencies, the risk of Counterparties fail to discharge an obligation is low, therefore there is no significant credit risk.

Endorsement given by parent on behalf of subsidiaries please refer to Note 31,c.

3) Liquidity risk

The objective of the Company's management of liquidity is to maintain cash and cash equivalents are sufficient for operating purpose, marketable securities with high liquidity and sufficient Loan Commitments and ensure the Company has adequate financial flexibility.

Liquidity and interest risk rate tables

The following table shows the remaining contractual maturity analysis of the Company's financial liabilities with agreed-upon repayment periods, which were based on the date the Company may be required to pay the first repayment and financial liabilities is evaluated based on undiscounted cash flows, including cash flows of interest and principal.

Bank loans with a repayment on demand clause were included in the second column of the table below regardless of whether or not the banks would choose to exercise early their rights to repayment. The maturity dates for other nonderivative financial liabilities were based on the agreed-upon repayment dates. The Company's liquidity analysis for its derivative financial instruments is also shown in the following table. The table was based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross cash inflows and outflows on those derivatives that require gross settlement. When the amount payable or receivable is not fixed, the amount disclosed has been determined by reference to the projected interest rates as illustrated by yield curves at the end of the reporting period.

-	<u>\$ 1,347,675</u>	<u>\$ 1,441,966</u>	

The outstanding accounts payable from related parties are unsecured and will be paid in cash, the terms of making collections and payables is from 30 days to 60 days; accounts receivable from related parties does not gather any deposit, and no expense was recognized for allowance for impairment loss.

b. Lease of properties (operating lease)

The Company rented out planes to Mandarin Airlines under an operating lease contract. The monthly rent received is based on flight hours. In 2015 and 2014, the rentals received amounted \$1,388,499 thousand and \$1,399,962 thousand, respectively.

For fleet scheduling, the Company rented planes from Mandarin Airlines under an operating lease agreement beginning from July 2003. The Company paid the rental by flight hours. The payment of flight rentals were \$205,604 thousand in 2015 and \$246,377 thousand in 2014, respectively.

Under an operating lease agreement, the Company rented flight training machines and flight simulators from China Aviation Development Foundation to train pilots. The Company paid the rental based on usage hours. In 2015 and 2014, the Company had paid rentals of about \$78,374 thousand and \$60,913 thousand, respectively.

In March 2010, the Company signed with CAL Park a one-year renewable operating lease agreement to use the Operating and Aviation Headquarters building of the Taiwan Taoyuan International Airport at a fixed rental of \$18,101 thousand monthly. In 2015 and 2014, the Company paid rentals of \$217,210 thousand each.

d. Bonds payable - related parties

Related parties that invested in the first issue of private unsecured bonds in 2012 (Note 19) are summarized as follows:

	December 31, 2014	
Related Party	Units	Aggregate Par/Dollars
The first issue of private unsecured bonds in 2012		
Taoyuan International Airport Services Mandarin Airlines Abacus Distribution Systems (Taiwan)	100 280 60	\$ 100,000 280,000 60,000

In 2015 and 2014, interest expenses are \$0 thousand and \$8,776 thousand, respectively. This bonds payable was paid off in January 2015. As of December 31, 2014 the interests payable were \$4,195 thousand.

e. Compensation of key management personnel

	For the Year Ended December 31		
	2015	2014	
Short-term employee benefits Post-employment benefits	\$ 45,813 <u>3,865</u>	\$ 39,282 <u>2,595</u>	
	<u>\$ 49,678</u>	<u>\$ 41,877</u>	

The remuneration of directors and key executives was determined by the remuneration committee having regard to the performance of individuals and market trends.

32. PLEDGED ASSETS

The following assets had been pledged or mortgaged as collaterals for long-term bank loans, lease obligations and business transactions:

	December 31		
	2015	2014	
Property, plant and equipment Restricted assets - noncurrent US treasury bills	\$ 88,609,505	\$ 102,792,761	
	236,634	279,497	
	<u>\$ 88,846,139</u>	<u>\$ 103,072,258</u>	

The above US treasury bills had been pledged as collaterals for Freighter Prince Ltd., which classified as restricted assets - noncurrent.

33. COMMITMENTS AND CONTINGENT LIABILITIES

As of December 31, 2015, the Company had commitments and contingent liabilities, as follows:

a. In January 2008, the Company entered into a contract to buy fourteen A350-900 planes from Airbus, with the option to buy six more A350-900 planes, with aggregate purchase prices of US\$3,933,235 thousand and US\$1,802,645 thousand, respectively. Excepted delivery slots of aircrafts are from 2016 to 2018.

Prepayments for aircraft purchases were as follows:

Decen	December 31		
2015	2014		
US\$ 685,231 thousand	US\$ 449,216 thousand		

b. In December 2012, the Company entered into a contract to buy six 777-300ER planes from the Boeing and the option to buy six more planes, at aggregate purchase prices of US\$2,067,261 thousand and US\$2,213,015 thousand, respectively. Expected delivery slots of aircrafts are from 2015 to 2016. The board of the Company has resolved to transfer the purchase right of the confirm orders for six aircrafts to the aircraft leasing Group (SKYHIGH XXXVII Leasing Company Limited) then leasing the aircrafts back. As of December 31, 2015, the Company had received 4 aircrafts and the refund of prepayments from leasing Company.

Prepayments for aircraft purchase were as follows:

Decem	iber 31
2015	2014
US\$ 197,912	US\$ 418,325
thousand	thousand

c. For the future development of company business, the Company entered into one 737-800 aircraft lease contract and letter of intention about six 737-800 aircrafts. The expected delivery slot will be March 2016.

- d. The Company has been named as a defendant, together with other airline members of the Association of Asia Pacific Airlines, in a civil class action filed with the US Northern District Court of California by some passengers, who alleged that there was an antitrust violation. The Company has properly joined the defendants' Joint Defense Group. The litigation is at the pretrial stage, and no evidence supporting the plaintiffs' allegation has been raised so far.
- e. The Company has reached a settlement with class plaintiffs of "Air Cargo Antitrust Class Action" by US\$9,000 thousand. One of class plaintiffs DHL Global Forwarding (DHL) et al. has opted out from class plaintiffs. In early 2015, DHL has filed civil lawsuit against the Company. The Company already appointed lawyer to duly react.

34. SIGNIFICANT ASSETS AND LIABILITIES DENOMINATED IN FOREIGN CURRENCIES

The following information was aggregated by the foreign currencies other than functional currencies of the Company entities and the exchange rates between foreign currencies and respective functional currencies were disclosed. The significant assets and liabilities denominated in foreign currencies were as follows:

December 31, 2015

	Foreign Currencies	Exchange Rate	Carrying Amount

RMB	122,666	5.0739	622,446
			(Concluded)

For the years ended December 31, 2015 and 2014, net foreign exchange gains (losses) were \$248,626 thousand and \$(83,129) thousand, respectively. It is impractical to disclose net foreign exchange gains (losses) by each significant foreign currency due to the variety of the foreign currency transactions.

35. ADDITIONAL DISCLOSURES

- a. Following are the additional disclosures required by the Securities and Futures Bureau for the Company and its investees:
 - 1) Financing provided: None.
 - 2) Endorsement/guarantee provided: Table 1 (attached).
 - 3) Marketable securities held: Table 2 (attached).
 - 4) Marketable securities acquired and disposed of at costs or prices of at least NT\$300 million or 20% of the paid-in capital: None.
 - 5) Acquisition of individual real estates at costs or price of at least NT\$100 million or 20% of the paid-in capital: None.
 - 6) Disposal of individual real estates at cost or prices of at least NT\$100 million or 20% of the paid-in capital: None.
 - 7) Total purchase from or sale to related parties amounting to at least NT\$100 million or 20% of the paid-in capital: Table 3 (attached).
 - 8) Receivables from related parties amounting to at least NT\$100 million or 20% of the paid-in capital: Table 4 (attached).
 - 9) Names, locations, and related information of investees on which the Company exercises significant influence: Table 5 (attached).
 - 10) Derivative financial transactions: Notes 7 and 8.
- b. Investment in Mainland China: Table 6 (attached).

36. SEGMENT INFORMATION

The Company mainly engages in air transportation services for passengers, cargo and others. The major revenue-generating asset is the fleet, which is jointly used for passenger and cargo services. Thus, the Company's sole reportable segment is the flight segment. For operating segment reporting in the financial statements, the Company's reportable segment comprises the flight and the non-flight business departments.
